About

Passionate developer, having worked primarily with web development and ERP development since 2001. Love to code, learn new technologies, and deliver the best possible solution in the most efficient way – clean, organized and with automated tests.

More than 17 years working with SAP solutions in several projects, including regional and global projects as ABAP and PI developer. Large experience with integration projects using PI/PO/CPI.

Five years working with Ivalua solution, working in implementation and upgrade projects, delivered new features for Public Sector vertical, as well as new integration packages for third-parties.

Worked in several industries, like Online Travel, Financial Systems, Chemical, Banking, Automotive, Consumer Products, Aerospace and Logistics, with diverse experience in multiple domains like Sales and Distribution, Billing, Finance, Taxes, Human Resources, Material Management, Sourcing, Procurement, EDI & ASN and Brazilian Localization.
